Projects

Project 1: Yahoo Mail (GlobalLogic India Pvt. Ltd.)
Yahoo Mail is a free email service offered by the American company Yahoo! It has more than 300 million users and I am working on Deals and Grocery modules to be specific. My core responsibility is to make sure that users has smooth user experience while purchasing the groceries. Work closely with the Developers in case if any bugs/defects come along the way.

Project 2: Recruitment Management Solutions
It is an Application Tracking System (ATS) which enables electronic management of recruitment needs such as sourcing, Streamline Interviews, Offer Management System, Employee referral System & Recruitment analysis.

Project 3: TR CRM (Customer Relationship Management)
Customer Relationship Management (CRM) is easy to operate and is seamlessly integrated into the
ATS. Which auto suggest the new prospect lead and track the real-time status of each lead with auto⬚alerts, automatically generate their business probability and tag important emails and enable
monitoring of sales team performance

Project 4: TR On-Boarding
This application streamlines the entire onboarding process of new hire by defining a paperless process (BGV, Pre Boarding, On Boarding and Post-Boarding) that makes transition of fresh recruits
to capable employees smooth.

Project 5: TR EDGE
Published different training programs and their schedules, automated the student enrolment / registration process, enabled trainers to evaluate / screen students, assessed the effectiveness of learning for the students through reporting & analytics.
